Quality of Life is in our DNA... 

In Papoutsanis, we believe that through a joined effort we can achieve a better future.

During 2012 we offered about 10.000 products to 44 charity organizations and other foundations but also to individual citizens in need.

We recycled 27 tons of paper, 34 tons of plastic and we continue with our company recycling program for batteries, bulbs, electronic appliances and other solid waste and other by products.

To us Corporate Social Responsibility means to pursue sustainable growth by continuously educating our people and invest in new technologies.

After All Quality of Life is in Papoutsanis' DNA...
